

## **CyberGhost listens to its users: An encrypted connection and a hidden IP are no longer enough**

**Bucharest, November 10th 2015 - CyberGhost VPN, creator of most advanced privacy and security solutions is launching CyberGhost 5.5 and enhances privacy through “easy to use all in one” user interface.**

An encrypted connection and a hidden IP are no longer enough. Advertising, online tracking tools that know even the precise location of users, malware, phishing attempts, and unsecure connections to e-payment gateways are immediate problems faced by most VPN users.

Committed to its No Logs policy, privacy company CyberGhost VPN is seeing a rapid growth of more than 500.000 users per month. CyberGhost's fight for a free internet and private connections includes yearly transparency reports, partnerships with organizations fighting for digital freedom and various campaigns to support access to the free internet in non-democratic countries.

With monthly surveys, CyberGhost has identified the different needs of its users aiming to offer the best privacy software on the market. In order to enhance a cumbersome free online experience, CyberGhost is the first privacy company to add new layers of privacy and security, all together in a user friendly and easy to use interface. With just one click, users can choose the best combination of features directly from the client interface.

Users can opt from various options such as: Ad-Blocker, Malware and Virus Protection, Data Compression to reduce mobile costs, Online Tracking Prevention and forced HTTPS connections when available.

“We have designed the most versatile and complete privacy product with the intention of offering the highest level of anonymity. The features are purposed to allow users enjoy the free internet, anonymize their online presence and through our NO LOGS policy, fight surveillance,” said CyberGhost's CEO and co-founder Robert Knapp.

Real time statistics show that 2000 beta users that have already been protected by CyberGhost from 67.350 malicious websites while more than 1million tracking attempts and ads were detected and removed. Users can see their personal statistics in the new My Account Device Management interface.

## About CyberGhost

Founded 2011 in Bucharest, Romania, CyberGhost S.R.L. is the creator of one of the world's most reliable privacy and security solutions in the world. The company secures and anonymizes the online presence of over 6 million users across the globe. CyberGhost S.R.L. defends privacy as a basic human right, being first in the industry to publish a transparency report while building new user-oriented crypto-technology for the future.

The Company has 25 employees consisting of a German developer team, and a group of highly motivated young IT experts located in Romania. Exceptionally experienced with internet anonymity and endeavor to work with like-minded persons, the company contributes an important part for the support of civil rights, a free society and an uncensored internet culture.

## About CyberGhost VPN

CyberGhost VPN establishes a 256 Bit AES encrypted connection to the CyberGhost-network. Here the online shown and clear recognizable IP address will be masked and replaced with an innocuous one. The Windows-Client is installed fast and is very intuitive. Also available is an iOS App and the support for the native protocols PPTP, L2TP/IPSec and OpenVPN; as well as a Mac and Android Client.
