

CyberGhost 6.0 for iOS: Unsexy technology packed in an elegant, easy to use app

Bucharest, April 20th, 2016 – *CyberGhost switches from offering a standard VPN service to providing the right set of solutions and solving specific needs of users.*

CyberGhost VPN is not only about encryption. World travelers, frequent mobile data users, privacy and security seekers or streaming services enthusiasts, don't search for a connection but a problem-solving app. The ease of use is designed to meet the requirements of both experienced and casual users.

CyberGhost 6.0 for iOS is the first to introduce automatic WiFi protection technology integrated into the Secure WiFi Hotspot Profile. Approximately 750,000 Wi-Fi hotspots are now being used by over 700 million people around the world. CyberGhost is solving the need to constantly check or activate WIFI protection to secure payments and sensitive information and eliminates the hassle of reestablishing a new VPN connection every time.

World travelers and users in countries with restricted access to content can enjoy the Secured Streaming Profile. With visibly improved speed and performance, CyberGhost iOS 6.0 offers users access to streaming services and enables rapid connections to blocked services. The Save Money Profile aims to help users reduce expensive carrier costs on mobile data or when creating a hotspot for other devices. Content like HTML, CSS, and JavaScript is compressed and minified.

90% of the most common World Wide Web exploits are delivered from advertising networks proving the ever-increasing power and sophistication of adware. CyberGhost VPN keeps its commitment to privacy by securing and anonymizing connections while blocking tracking attempts. The Surf Anonymously Profile is optimized for both WiFi and mobile networks and provides rapid access to more than 650 servers in 30 countries.

“The world simply gets mobile and devices are an interesting target for both intelligence services and hackers. We have switched to a mobile-first strategy and as a result, we developed a breakthrough iOS product that will impact the use of VPN-technology on an iPhone. Encryption, no matter where it is used, is still far away from being super-user-friendly. CyberGhost iOS 6.0 is the first step towards transforming high-end technology into easy to use solutions”, said Robert Knapp, CEO, and co-founder of CyberGhost VPN.

The latest CyberGhost 6.0 for iOS is available for free download in the App Store: <https://itunes.apple.com/app/apple-store/id583009522> To find out more about the new features and profiles, please access: [http://www.cyberghostvpn.com/en\\_us/cyberghost-for-ios](http://www.cyberghostvpn.com/en_us/cyberghost-for-ios)

## About CyberGhost

Founded 2011 in Bucharest, Romania, CyberGhost S.R.L. is the creator of one of the world's most reliable privacy and security solutions in the world. The company secures and anonymizes the online presence of over 8.5 million users across the globe. CyberGhost S.R.L. defends privacy as a basic human right, being first in the industry to publish a transparency report while building new user-oriented crypto-technology for the future.

The Company has 30 employees consisting of a German developer team, and a group of highly motivated young IT experts located in Romania. Exceptionally experienced with internet anonymity and endeavor to work with like-minded persons, the company contributes an important part for the support of civil rights, a free society and an uncensored internet culture.

## About CyberGhost VPN

CyberGhost VPN establishes a 256 Bit AES encrypted connection to the CyberGhost-network. Here the online shown and clear recognizable IP address will be masked and replaced with an innocuous one. The Windows-Client is installed fast and is very intuitive. Also available is an iOS App and the support for the native protocols PPTP, L2TP/IPSec and OpenVPN; as well as a Mac and Android Client. For more information about CyberGhost's products, visit <http://www.cyberghostvpn.com>
